

CONTACT INFORMATION	Computer Science Department Boston University MCS 105C, 111 Cummington Street Boston, MA 02215 E-mail: zczhu@bu.edu Website: https://cs-people.bu.edu/zczhu	
RESEARCH INTERESTS	Databases, Data Management and Data systems.	
EDUCATION	Ph.D. in Computer Science, Boston University, Massachusetts, USA.	2019 - Present
	MPhil in Computer Science, the University of Hong Kong (HKU). Thesis: “Effective and Efficient Discovery of Top-k Meta Path in Heterogeneous Information Networks”	2017 - 2019
	B.Sc. in Software Engineering, Tsinghua University.	2013 - 2017
PROFESSIONAL EXPERIENCE	• PhD Researcher at Boston University • Software Engineering Intern at RocksDB, Meta • Research Intern at DASLab SEAS, Harvard • System Engineer Intern at Weibo Corporation	Sept 2019 - Present May 2022 - Aug 2022 July 2018 - Oct 2018 June 2017 - Aug 2017
ACADEMIC SERVICE AND AWARD	• ACM SIGMOD Student Travel Award 2022 • ACM SIGMOD Availability Committee 2021 • Online student volunteer in VLDB 2020 • Committee member in ICTAI 2021 • Student volunteer in BDAI Workshop, HKU, 2019 • External reviewer of WISE2020, ER2019, CIKM2018, DASFAA2018, DASFAA2022

TEACHING EXPERIENCE (SELECTED)	Boston University (Teaching Fellow) - CS 561 (Data Systems Architectures) Spring 2022 - CS 660 (Graduate Introduction to Database Systems) Fall 2020, Fall 2021 - CS 460 (Introduction to Database Systems) Spring 2021 - CS 237 (Probability in Computing) Spring 2020 - CS 105 (Introduction to Databases and Data Mining) Fall 2019 University of Hong Kong - CCST9047 (The Age of Big Data) Spring 2018 - CCST9047 (The Age of Big Data) Spring 2019	2019 - Present 2017 - 2019
MPHIL THESIS	Zichen Zhu. <i>Effective and Efficient Discovery of Top-k Meta Path in Heterogeneous Information Networks</i>, MPhil Thesis, 2019, Department of Computer Science, University of Hong Kong. (under the supervision of Dr. Reynold Cheng) I worked on effective and efficient discovery of top-k meta paths under the supervision of Dr. Reynold Cheng, Professor, Department of Computer Science, the University of Hong Kong. In this work, I observe that the shortest meta path between two nodes cannot identify the most representative relation and I propose a ranking function that seamlessly integrates existing ranking functions into a multi-step searching framework and I combine bidirectional searching with this framework to further boost the searching efficiency.	
TECHNICAL SKILLS	Programming Languages: C, C++, Java, Python, JavaScript Markup Languages: HTML, XML, $\text{\LaTeX}$ Database Management Systems: RocksDB, MongoDB, MySQL, PostgreSQL Web Development: Django, Flask, CodeIgniter	
LAST UPDATE:	Sept 2022
